The Company intends to utilise the funds raised:

- for the repayment of US\$1.5 million to either the existing debt facility or to be allocated to the acquisition of assets subject to the lenders approval;

- for general working capital purposes; and
- to pay the costs of the Offer.

This Offer Document is not an investment statement or Offer under New Zealand law and may not contain all the information that an investment statement or Offer under New Zealand law is required to contain.

4.3 Other foreign jurisdictions and restrictions on the distribution of this Offer Document

This Offer Document and accompanying Entitlement and Acceptance Form do not, and are not intended to, constitute an offer of New Shares in any place in which, or to any person to whom, it would be unlawful to make such an offer, invitation or issue. By applying for New Shares, including submitting the Entitlement and Acceptance Form or making a payment using BPAY®, you represent and warrant that there has been no breach of such laws.

The distribution of this Offer Document and the accompanying Entitlement and Acceptance Form outside of Australia or New Zealand may be restricted by law and persons who come into possession of this Offer Document and the accompanying Entitlement and Acceptance Form should seek advice on and observe those restrictions. Any failure to comply with those restrictions may constitute a violation of applicable securities laws. The Company disclaims all liability to persons.

No action has been taken to register or qualify this Offer Document, the New Shares or the Offer, or otherwise to permit a public offering of the New Shares, in any jurisdiction outside Australia and New Zealand.

The Offer does not constitute an offer in the United States of America, nor does it constitute an offer to a person who is a US Person or someone who is acting on behalf of a US Person. The New Shares have not been, and will not be, registered under the US Securities Act 1933 and may not be offered or sold in the United States of America or to, or for the account or benefit of, US Persons (as defined in Rule 902 under the US Securities Act) except under an available exemption from registration under the US Securities Act. 4.4 Notice to nominees and custodians

Shareholders resident in Australia and New Zealand holding Shares on behalf of persons who are resident overseas are responsible for ensuring that taking up an Entitlement under the Offer does not breach regulations in the relevant overseas jurisdiction. 4.5 Ineligible Shareholder nominee

Pursuant to ASX Listing Rule 7.7.1(c), the Company has appointed a nominee in Australia, Sanston Securities Australia Pty Ltd (ABN 61 156 057 064) ("**Sanston**"), to arrange the sale of the Entitlements to which Ineligible Shareholders are entitled. Sanston will have the absolute and sole discretion to determine the timing and price at which the Entitlements may be sold and the manner of any such sale.

Any interest earned on the proceeds of the sale of these Entitlements will firstly be applied against expenses of such sale, and any balance will accrue to the relevant Ineligible Shareholders as described below.

The net proceeds of the sale of these Entitlements will then be forwarded by the Company as soon as practicable to the Ineligible Shareholders, in proportion to their share of such Entitlements (after deducting commission and other expenses). If any such net proceeds of sale are less than the reasonable costs that would be incurred by the Company for distributing those proceeds, such proceeds may be retained by the Company. Notwithstanding that, Sanston may arrange the sale of the Entitlements. Ineligible Shareholders may nevertheless receive no net proceeds if the costs of the sale are greater than the sale proceeds.

Neither the Company nor Sanston will be subject to any liability for failure to sell the Entitlements or to sell them at a particular price. If, in the reasonable opinion of Sanston, there is no viable market for the Entitlements of the Ineligible Shareholders, or a surplus over the expenses of the sale cannot be obtained the Entitlements that would have been offered to the Ineligible Shareholders, then those Entitlements will be allowed to lapse. The New Shares not taken up will form part of the New Shares to be taken up by the Underwriter pursuant to the Underwriting Agreement.

The Company will pay Sanston a fee of 1.5% on the total gross dollar value of all Entitlements sold or \$1,500 (plus applicable GST), whichever is the greater.

Please read the instructions carefully.

Please complete the Entitlement and Acceptance Form by filling in the details in the spaces provided and attach a cheque (refer to Section 5.10) for the Application Monies indicated on the Entitlement and Acceptance Form.

If you wish to pay via BPAY®, payment may be made in accordance with Section 5.11.

5.4 Selling all your Entitlement on ASX

The Entitlements under the Offer are renounceable, which means that all or part of an Eligible Shareholder's rights to subscribe for New Shares under the Offer may be traded on ASX. If you wish to sell all of your Entitlement on ASX, please provide instructions to your stockbroker regarding the Entitlement you wish to sell on ASX. Trading of Entitlements will commence on ASX on 23 December 2016 and will cease on 13 January 2017. In the event that the Closing Date is extended, the period in which Entitlements may be traded will also be extended.

There is no guarantee that an Eligible Shareholder will be able to sell all or any part of their Entitlement on ASX or that any particular price will be paid for the Entitlements sold on ASX.

5.5 Taking up a proportion of your Entitlement and selling the balance on ASX

If you wish to take up only part of your Entitlement, complete the accompanying Entitlement and Acceptance Form for the number of New Shares you wish to take up and follow the steps in Section 5.3, or make a payment by BPAY® in accordance with Section 5.11.

Subsequently, provide instructions to your stockbroker regarding the proportion of your Entitlement you wish to sell on ASX and follow the steps in Section 5.4.

5.6 Taking up a proportion of your Entitlement and allowing the balance to lapse

If you wish to take up only part of your Entitlement and allow the balance to lapse, complete the accompanying Entitlement and Acceptance Form for the number of New Shares you wish to take up and follow the steps in Section 5.4 or make a payment by BPAY® in accordance with Section 5.11. If you take no further action, the balance of your Entitlement will lapse and you will have forfeited any potential benefit to be gained from taking up or selling that part of your Entitlement.

5.7 Selling all or a proportion of your Entitlement other than on ASX

You may elect to transfer all or a proportion of your Entitlement to another person other than on ASX. If the purchaser of your Entitlement is an Ineligible Shareholder or a person that would be an Ineligible Shareholder if they were a registered holder of Shares, that purchaser will not be able to take up the Entitlement they have purchased.

5.11 Payment by BPAY®

For payment by BPAY®, please follow the instructions on the Entitlement and Acceptance Form. You can only make a payment via BPAY® if you are the holder of an account with an Australian financial institution that supports BPAY® transactions. Please note that should you choose to pay by BPAY®:

- (a) you do not need to submit the Entitlement and Acceptance Form but are taken to have made the declarations on that Entitlement and Acceptance Form and the representations outlined in Section 5.9; and
- (b) if you do not pay for your Entitlement in full, you are deemed to have taken up your Entitlement in respect of such whole number of Shares which is covered in full by your Application Monies.

Make sure that you use the specific Biller Code and unique Customer Reference Number (CRN) on your personalised Entitlement and Acceptance Form. If you have more than one shareholding of Shares and consequently receive more than one Entitlement and Acceptance Form, when taking up your Entitlement in respect of one of those shareholdings only use the CRN specific to that shareholding as set out in the applicable Entitlement and Acceptance Form. Do not use the same CRN for more than one of your shareholdings. This can result in your Application Monies being applied to your Entitlement in respect of only one of your shareholdings (with the result that any Application in respect of your remaining shareholdings will not be valid).

It is your responsibility to ensure that your BPAY® payment is received by the share registry by no later than 5:00pm (Sydney time) on the Closing Date. You should be aware that your financial institution may implement earlier cut-off times with regards to electronic payment and you should therefore take this into consideration when making payment. Any Application Monies received for more than your final allocation of New Shares (only where the amount is \$1.00 or greater) will be refunded. No interest will be paid on any Application Monies received or refunded.

5.12 Minimum subscription

There is no minimum subscription for the Offer.

5.13 Underwriting

The Offer is fully underwritten by the Underwriter.

5.14 Rights attaching to Shares

New Shares issued pursuant to the Offer will be fully paid and rank equally with all other issued Shares including in respect of dividends.

The rights attaching to Shares are set out in the Company's constitution and are regulated by the Corporations Act, the ASX Listing Rules and general law.

5.15 Issue and despatch

New Shares issued pursuant to the Offer will be issued in accordance with the ASX Listing Rules. The expected dates for issue of New Shares offered by this Offer Document and despatch of holding statements is expected to occur on the dates specified in the Timetable.

New Shares issued pursuant to the Shortfall Offer will be issued on a progressive basis.

Pending the issue of the New Shares pursuant to this Offer Document, all Application Monies will be held by the Company in trust for the Applicants in a separate bank account as required by the Corporations Act. The Company will be entitled to retain all interest that accrues on the bank account and you waive the right to claim interest by completing and returning the Entitlement and Acceptance Form.

It is your responsibility to determine the allocation prior to trading in the New Shares. If you sell New Shares before you receive your holding statement, you do so at your own risk.

5.16 ASX quotation

Application for official quotation by ASX of the New Shares offered pursuant to this Offer Document will be made within 7 days after the date of this Offer Document. If approval is not obtained from ASX before the expiration of 3 months after the date of this Offer Document (or such period as varied by the ASIC) the Company will not issue any New Shares and will repay all Application Monies for the New Shares within the time prescribed under the Corporations Act, without interest.

The fact that ASX may grant official quotation to the New Shares is not to be taken in any way as an indication of the merits (if any) of the Company or the New Shares.

5.17 Withdrawal of the Offer

The Company reserves the right to withdraw the Offer at any time before the issue of New Shares in which case the Company will refund any Application Monies received by it in accordance with the Corporations Act and will do so without interest being paid to applicants.

Shareholders will be able to download a copy of their Entitlement and Acceptance Form from the Computershare Investor Services Pty Limited Investor Centre (by going to www.investorcentre.com).

6. PURPOSE AND EFFECT OF THE OFFER

6.1 Purpose of the Offer

Completion of the Offer will result in an increase in cash in hand of approximately \$6.1 million (before the payment of costs associated with the Offer which are estimated to be approximately A\$585,000 (exclusive of GST)).

The Company intends to utilise the funds raised:

- for the repayment of US\$1.5 million to either the existing debt facility or to be allocated to the acquisition of assets subject to the lenders approval;
- to provide equity for the acquisition of undervalued USA oil assets that would be considered bolt-on opportunities for the Company's existing Mid-Con operations;
- to undertake development of existing oil assets held by the Company in Kansas and Oklahoma;
- for negotiations and work programs undertaken in the Northern Territory;
- for general working capital purposes; and
- to finance expenses of the Offer.

The above statement is a statement of current intentions as at the date of this Offer Document. Intervening events and new circumstances have the potential to affect the ultimate way funds will be applied. The Board reserves the right to alter the way funds are applied on this basis.

6.2 Underwriting and sub-underwriting

The Offer is fully underwritten by the Underwriter. Refer to Section 8.1 of this Offer Document for a summary of the Underwriting Agreement.

The Company will pay to the Underwriter an underwriting fee equal to 5% of the amount underwritten (being approximately A\$305,000) ("**Underwriting Fee**").

The Underwriter may appoint one or more sub-underwriters ("**Sub-Underwriters**"). Any Sub-Underwriters may receive part of the Underwriting Fee.

6.3 Effect on Capital Structure

Following the completion of the Offer, the capital structure of the Company will be as follows:

Contributed Equity	Shares
Shares on issue prior to the Offer (i)	347,313,877
Approximate number of New Shares to be issued under this Offer Document (ii)	764,090,529
Total Shares of the Company when Offer is closed	1,111,404,406

(i) *It is assumed that no existing Options or Performance Rights are exercised and that no further Shares are issued by the Company on or before the Record Date.*

(ii) *This number of New Shares may vary slightly due to rounding of Entitlements and may increase as a result of the rounding up of New Shares offered under the Offer.*

The Company has the following Options and Performance Rights on issue:

Number of Options	Exercise Price \$AUD	Expiry Date
3,500,000	\$0.149	31 December 2016
1,500,000	\$0.169	31 December 2016
1,500,000	\$0.179	31 December 2016
1,000,000	\$0.03	25 August 2019
7,500,000		

Performance Rights			
2,500,000	Unquoted Performance Rights	subject to	preconditions being met

The Options and Performance Rights on issue carry no right to participate in the Offer unless the Options and Performance Rights are exercised before the Record Date.

6.4 Effect on control of the Company and potential dilution to Shareholders

The Underwriter is not a shareholder of the Company. Any New Shares which are issued to the Underwriter may increase the Underwriter's voting power in the Company. The Underwriter is not a related party of the Company for the purposes of the Corporations Act.

The Underwriter has agreed to use its best endeavours to allocate any shortfall of New Shares to sub-underwriters such that neither the Underwriter nor any of its Sub-Underwriters will individually have a voting power in the Company in excess of 20%.

The number of New Shares that may be held by the Underwriter and its voting power under several scenarios are set out in the table below.

Event	New Shares held by Underwriter	Voting power of Underwriter
Date of Offer	Nil	0.00%
Completion of The Offer:		
Fully subscribed	Nil	0.00%
75% subscribed	191,022,632	17.2%
50% subscribed	382,045,265	34.4%
25% subscribed	573,067,897	51.6%
0% subscribed	764,090,529	68.8%

The number of New Shares held by the Underwriter and its voting power in the table above show the potential effect of the underwriting of the Offer. However, it is unlikely that no Shareholders will take up Entitlements under the Offer. The underwriting obligation and therefore voting power of the Underwriter will reduce by a corresponding amount for the amount of Entitlements under the Offer taken up by Shareholders.

Further, the Underwriting Agreement gives the Underwriter the right to enter into sub-underwriting agreements to pass on some or all of its obligations to subscribe for the Shortfall under the Underwriting Agreement.

The Company has lodged with the ASX a notice in accordance with section 708AA of the Corporations Act which sets out, amongst other things, the effect of the Offer on the control of the Company. This notice may be viewed on the websites of the Company and the ASX.

The Company expressly disclaims any responsibility for ensuring that any existing Shareholder or new Shareholder does not breach section 606 of the Corporations Act by increasing its voting power in the Company to more than 20% of the Company's issued capital.

6.5 Details of Substantial Holders

As at the date of this Offer Document, the Company's largest Shareholder is Macquarie Bank Limited, which has a voting power of 15.45%. Given that the Offer is fully underwritten, its voting power will remain the same if it accepts its Entitlement (unless it is allocated any Shortfall Shares).

6.6 Director intentions

Each director of the Company has shown their support for the Offer by indicating that they intend to subscribe for part or all of their Entitlements under the Offer.

6.7 Shortfall Offer

Any Entitlement not taken up pursuant to the Offer will form the Shortfall Offer.

The Shortfall Offer is a separate offer made pursuant to this Offer Document and will remain open until the Closing Date. The issue price for each Share to be issued under the Shortfall Offer shall be \$0.008 being the price at which Shares have been offered under the Offer.

Eligible Shareholders who wish to subscribe for New Shares above their Entitlement are invited to apply for additional New Shares under the Shortfall Offer by completing the appropriate section on their Entitlement and Acceptance Form.

The Shortfall to the Offer is to be issued at the absolute discretion of the Directors in consultation with the Underwriter and as such there is no guarantee that any Shortfall Shares applied for will be issued to Eligible Shareholders. No Shareholder will be issued any Shortfall Shares if, as a result of such issue, their voting power in the Company would increase from 20% or below to more than 20% or from a starting point that is above 20% and below 90%.

7. RISK FACTORS

7.1 Introduction

An investment in New Shares made under this Offer should be considered speculative. An investment in the Company is not risk free and the Directors strongly recommend investors to consider the risk factors described below, together with information contained elsewhere in this Offer Document and to consult their professional financial advisers before deciding whether to apply for New Shares pursuant to this Offer.

There are specific risks which relate directly to the Company's business. In addition, there are other general risks, many of which are largely beyond the control of the Company and the Directors. The risks identified in this Section, or other risk factors, may have material impact on the financial performance of the Company and the market price of the Shares.

The following is not intended to be an exhaustive list of the risk factors to which the Company is exposed.

7.2 Company Specific

a) Potential for significant dilution

Upon implementation of the Offer, assuming no Options or Performance Rights are exercised prior to the Record Date the number of Shares in the Company will increase from 347,313,877 currently on issue to 1,111,404,406. This means that each Share will represent a significantly lower proportion of the ownership of the Company.

There is also a risk that the interests of Shareholders will be further diluted as a result of future capital raisings required in order to fund the development of the Company's business and projects.

It is not possible to predict what the value of the Company or a Share will be following the completion of the Offer being implemented and the Directors do not make any representation as to such matters.

The last trading price of Shares on ASX prior to the Offer is not a reliable indicator as to the potential trading price of Shares after completion of the Offer.

b) Going concern risk

The Company's financial report for the half-year ended 30 June 2016 (released to ASX on 13 September 2016) includes a note that the financial report had been prepared on a going concern basis which assumes continuity of normal business activities, the realisation of assets and the settlement of liabilities in the ordinary courses of business.

The Company's financial position reflects an excess of current liabilities over current assets of US\$35,049,444. This is primarily due to the policy of the Company of determining that all debt facilities be classified as current liabilities, whereas assets are classified as long term assets. Net assets is US\$33.33 million. In April 2016, the debt facilities were extended for a further three years. The Company was required to make a debt repayment of US\$1,500,000 by 16 September 2016. This repayment date has been extended based on the successful completion of the Offer.

The Directors consider the going concern basis used in the preparation of the financial report is appropriate and upon the successful completion of the Offer, the Company will have sufficient funds to adequately meet the Company's current expenditure commitments and short term working capital requirements. However, it is highly likely that further funding will be required to

meet the medium to long term working capital costs of the Company. Please refer to Section 8.2(d) below for further details.

In the event that the Offer is not completed successfully there may be significant uncertainty as to whether the Company can continue as a going concern and which is likely to have a material adverse effect on the Company's activities.

c) Land holdings

The Company holds over 3,700 leases. Further, the Company may sell and buy leases as the normal course of its business. At present, the Company intends to focus on its existing producing assets in Appalachia and Kansas and development focus on its assets in Kansas and Oklahoma, as it is believed these will provide required returns on capital at current market prices.

d) Funding

The Company's ability to effectively implement its business and operations plans in the future, to take advantage of opportunities for acquisitions, joint ventures or other business opportunities and to meet any unanticipated liabilities or expenses which the Company may incur may depend in part on its ability to raise additional funds. The Company may seek to raise further funds through equity or debt financing, production sharing arrangements or other means typical in the USA oil and gas industry. Failure to obtain financing for the Company's activities and future projects may result in delay and indefinite postponement of exploration, development or production on the Company's properties or even loss of a property interest. There can be no assurance that additional finance will be available when needed or, if available, the terms of the financing might not be favourable to the Company and might involve substantial dilution to Shareholders.

The Company has in place a US\$200 million (drawn to approximately US\$40.5 million) Credit Facility with Macquarie Bank Limited ("**Bank**") which can be utilised for either acquisitions and/or development capital. Any drawdown is subject to the Bank's approval and will be subject to normal lending covenants and conditions.

Loan or credit agreements and other financing rearrangements such as debt facilities, convertible note issues and finance leases (and any related guarantee and security) that may be entered into by the Company may contain covenants, undertakings and other provisions which, if breached, may entitle lenders to accelerate repayment of loans and there is no assurance that the Company would be able to repay such loans in the event of an acceleration. Enforcement of any security granted by the Company or default under a finance lease could also result in the loss of assets.

Further, the Company, in the ordinary course of its operations and developments, is required to issue financial assurances, particularly insurances and bond/bank guarantee instruments to secure statutory and environmental performance undertakings and commercial arrangements. The Company's ability to provide such assurances is subject to external financial and credit market assessments and its own financial position.

The Company is exposed to risks associated with its financial instruments, which may consist of cash, receivables, accounts payable and accrued liabilities (due to third parties from time to time) and commodity swaps or hedges. This includes the risk that a third party to a financial instrument fails to meet its contractual obligations, the risk that the Company will not be able to meet its financial obligations as they fall due, and the risk that market prices may vary which will affect the Company's income.

e) Reliance on Key Personnel

The responsibility for overseeing day to day operations and the strategic management of the Company is concentrated amongst a small number of key personnel. While it is not currently anticipated, one or any number of these key personnel may cease employment with the Company. The loss of any such key employees of the Company could have the potential to have a detrimental impact on the Company until the skills that are lost are adequately replaced. A change in the individuals which make up the Board of the Company may potentially have a detrimental impact on the Company.

f) Contractual Risk

The Company's ability to efficiently conduct its operations may depend upon a number of contracts. As in any contractual relationship, the ability for the Company to ultimately receive the benefit of the contract is dependent upon the relevant third party complying with its contractual obligations. To the extent that such third parties default in their obligations, it may be necessary for the Company to enforce its rights under any of the contracts and pursue legal action. Such legal action may be costly and no guarantee can be given by the Company that a legal remedy will ultimately be granted on appropriate terms.

7.3 Industry specific

a) Oil & Gas Exploration

The prospects in which the Company has an interest are at various stages of pre-exploration due diligence, exploration or production, and potential investors should understand that exploration and development are high-risk undertakings.

Oil and gas exploration is a high risk, speculative activity that requires a large amount of expenditure over extended periods of time. There is no guarantee that exploration will result in commercial discoveries.

Technical conclusions during exploration, appraisal and production are subject to the uncertainties associated with all sampling techniques and to the risk of incorrect interpretation of geological, geophysical, drilling and other data.

b) Commercialisation

Even if the Company recovers potentially commercial quantities of oil and gas, there is no guarantee that the Company will be able to successfully transport the oil and gas to commercially viable markets or sell the oil and gas to customers to achieve a commercial return. However, where the Company operates in the USA there are significant number of pipelines and refineries for delivery of the Company's products.

c) Oil and gas reserves and commercial law

Oil and gas reserves are expressions of judgment based on knowledge, experience and industry practice. Estimates, which were valid when originally calculated, may change significantly when new information or techniques becomes available. In addition, by their nature, oil and gas reserves are imprecise and depend to some extent on interpretations which may prove to be inaccurate. As further information becomes available through additional fieldwork and analysis, the estimates are likely to change. This may result in alterations to development and commercial flow plans which may, in turn, either benefit or adversely affect the Company's operations.

All the oil and gas reserves of the Company are reviewed by independent reservoir engineers, registered with the USA Securities and Exchange Commission ("**SEC**") and are undertaken at least once a year.

d) Operations

The operations of the Company may be affected by various factors, including failure to locate or identify oil and gas reserves, failure to achieve predicted well production flow rates, operational and technical difficulties encountered in production, difficulties in commissioning and operating plant and equipment, mechanical failure or plant breakdown, unanticipated reservoir problems which may affect field production performance, adverse weather conditions, industrial and environmental accidents, industrial disputes and unexpected shortages or increases in the costs of consumables, spare parts, plant and equipment.

e) Oil and gas volatility and exchange rates

Revenue from oil and gas production is exposed to oil and gas price and exchange rate risks. Oil and gas prices fluctuate and are affected by many factors beyond the control of the Company. Such factors include supply and demand fluctuations, technological advancements, forward selling activities and other macro-economic factors.

International prices of oil and gas are denominated in United States dollars, the currency of the accounts of the Company. However, as the Company's shares are denominated in Australian dollars, fluctuations and volatility of the rate of exchange between the United States dollar and the Australian dollar may affect the share price.

f) Environmental

The operations and proposed activities of the Company are subject to Australian and US laws and regulations concerning the environment. As with most exploration and production operations, the Company's activities are expected to have an impact on the environment. The Company conducts its activities to the highest standard of environmental standards, ensuring compliance with all environmental laws. Nevertheless, there are certain risks inherent in the Company's activities such as accidental leakages or spills, or other unforeseen circumstances which could subject the Company to liability.

g) Sovereign

The Company's projects, both in Australia and USA, are subject to sovereign risk. These risks may include economic, social or political instability or change, hyperinflation, currency non-convertibility or instability and changes of law affecting ownership, government participation, taxation, working conditions, rates of exchange, exchange control, exploration licensing, export duties, environmental protection, labour relations as well as government control over natural resources or government regulations that require the employment of local staff or contractors or require other benefits to be provided to local residents.

Any future material adverse changes in government policies or legislation, in regions in which the Company operates, may affect ownership, and development in oil and gas exploration and production, which in turn may affect the viability and profitability of the Company.

h) Title

The system for obtaining development rights to oil and gas leases in the USA and Australia can be complex given that numerous parties may hold the surface rights or undivided mineral estate to a tract of land. Securing the leases to those mineral estates often requires lengthy negotiation with the various parties.

In the USA to independently verify that the parties with whom a company is dealing are the correct and sole holders of the mineral estate and to analyse the full rights and restrictions applying to the interest held by those parties requires that a company obtain detailed title opinions from appropriately qualified and experienced lawyers. This can be a lengthy and

expensive process and the final opinions are often the subject of numerous qualifications and requirements.

7.4 General risks

a) Economic

General economic conditions, movements in interest and inflation rates and currency exchange rates may have an adverse effect on the Company's exploration, development and production activities, as well as on its ability to fund those activities.

b) Market conditions

Share market conditions may affect the value of the Company's quoted securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- general economic conditions in Australia, the USA and elsewhere may have a negative impact on equity markets;
- introduction of tax reform or other new legislation;
- interest rates and inflation rates;
- changes in investor sentiment toward market sectors;
- the demand for and supply of capital; and
- terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general and resource exploration and production companies. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

c) Taxation

The acquisition and disposal of shares will have tax consequences, which will differ depending on the individual financial affairs of each investor. All potential investors in the Company are urged to obtain independent financial advice about the consequences of acquiring Shares from a taxation viewpoint and generally.

To the maximum extent permitted by law, the Company, its officers and each of their respective advisors accept no liability and responsibility with respect to the taxation consequences of subscribing for Shares under this Offer.

d) Reliance on key personnel

The responsibility of overseeing the day-to-day operations and the strategic management of the Company depends substantially on its senior management and its key personnel. There can be no assurance given that there will be no detrimental impact on the Company if one or more of these employees cease their employment.

e) Managing Growth

The Company's success will depend on its ability to expand its operations. If the Company is unable to successfully manage the expansion of its business, its financial condition and results of operations could be materially adversely affected.

7.5 Speculative Investment

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company. The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of the Shares offered under this Offer.

Therefore, the New Shares carry no guarantee with respect to the payment of dividends, returns of capital or the market value of those New Shares.

Potential investors should consider that the investment in the Company is speculative and should consult their professional advisers before deciding whether to apply for Shares pursuant to this Offer.

7.6 Force Majeure

There are some risks which cannot be prevented by the Company that could impact upon the business of the Company. These risks include earthquakes, storm damage, sabotage and war. The Company has mitigated some of these risks by taking out appropriate insurance cover where reasonably possible.

These obligations require the Company to notify ASX of information about specific events and matters as they arise as well as the lodgment of yearly and half-yearly financial statements, audit or review reports and quarterly reports.

The Company is required to immediately notify ASX of any information concerning the Company which it is or becomes aware and which a reasonable person would expect to have a material effect on the price of value of Shares, subject to certain exceptions.
